B.Eng. CSE • CGPA: 9/10
Chitkara University, 2021

Class XII, CBSE • 92%
D.A.V. Public School, 2017

Class X, CBSE • CGPA: 10/10
D.A.V. Public School, 2015

CERTIFICATION

Azure Fundamentals AZ-900
Microsoft Certified

WORK EXPERIENCE

Tyke • Gurgaon, India
Full Stack Developer • Mar 2022 - Present

- Led the P2P investor flow: Executed integrations with NBFCs to facilitate seamless operations.
- Developed the authorization and authentication module with HTTP cookies, JWT tokens and Auth middleware using Redis and AWS Cognito.
- Single-handedly implemented the KYC flow: Created the microservices architecture, integrated third-party vendors, used MongoDB & PostgreSQL for data storage, wrote unit test cases, and facilitated migrations using GORM.
- Single-handedly implemented the document signing flow: Handled webhooks, facilitated callbacks using AWS Lambdas & Crons, and enabled storage of documents on AWS S3.
- Worked with escrow, in-app wallets, and payment gateways such as Juspay, Stripe, Tazapay, etc.
- Created an editor to customize HTML according to needs along with a PDF previewer using React and open source libraries.
- Developed an internal admin dashboard assisting in customer support using React and NodeJS.
- Developed a module that converts HTML to PDF using Golang.

SurveySensum • Gurgaon, India
Full Stack Developer • Jul 2021 - Mar 2022

- Worked on Outlook Add-In to integrate survey in emails using Microsoft OpenAPI and JavaScript.
- Handled the payments module and facilitated integrations with Stripe using C# and Angular on frontend.
- Developed multiple client dashboards visualizing various survey insights using Angular.
- Created a responsive survey collection software with dashboards ranging from simple to complex data.

Full Stack Developer Intern • Dec 2020 - Jul 2021

- Single-handedly implemented integration with third-party vendors and facilitated data migration.
- Contributed to developing a data processing engine and a text analytics module capable of processing huge amounts of data within seconds.

PROJECTS

WcGo [Link](#)
A custom wc tool using Golang that counts bytes, lines, words and characters from a file or read from input stream.

My Portfolio [Link](#)
A responsive website built using HTML, CSS, JavaScript & React.
